Welcome Gardening Friends!

For over 50 years, Charley's Greenhouse & Garden Supply has been the trusted choice for greenhouse gardeners in America.

It all began in 1973 when Charley Yaw, fresh out of college, built a backyard greenhouse that thrilled a customer, sparking word-of-mouth sales. At the time, it was hard for backyard gardeners to find supplies, so Charley and his wife, Carol, created a small black and white catalog. Despite having limited funds to print just 400 copies, their business took off. Over time, Charley's became the #1 supplier of specialized greenhouse equipment and garden supplies in the USA.

With Charley and Carol now retired, our team continues their legacy of **customer care, offering expert tips on plant**

care, pest control, and greenhouse design. We're excited to announce that Charley's has joined the **BC Greenhouse Builders** family, a company that shares our dedication to outstanding quality and customer satisfaction. Together, we promise to keep providing you with eco-friendly products, personalized service, and support for your gardening journey, whether you're a seasoned gardener or just starting out. **Connect with us today!**

Charley & Carol, 1975

Here at Charley's, we've been helping gardeners create the perfect garden setup for over 50 years. With our **three distinct greenhouse lines**, our **Garden Supply Store**, and sister-brand **Polycarbonate Store**, we have everything you need to bring any project to life!

Cross Country Greenhouses

Our **Cross Country Greenhouses** by BC Greenhouse Builders are built to last. These greenhouses are crafted with premium aluminum frames and have been the choice for customizing and creating your vision for over 74 years. Choose from made to order or ready to ship options. Combined with weather resistance, high wind and snow loads and a lifetime warranty, these are the greenhouses that stand the test of time.

Winter Gardenz Greenhouses

Our **Winter Gardenz Greenhouses**, manufactured in New Zealand for the last 15 years, are a less costly option that is ready to ship today. With four standard backyard sizes in stock, this is a great option for budget-friendly buyers who are looking for a greenhouse to withstand the elements that don't require modifications. Your choice of glass or polycarbonate to suit your climate.

Heritage Wood Greenhouses

Our **Heritage Wood Greenhouses** are handcrafted in the Charley's Mount Vernon, WA Woodshop from hand-selected Western Red Cedar. These made to order greenhouses are more than just functional; they're a statement piece for your backyard, bringing charm and delight to gardeners for over 20 years.

We invite you to check out our **GARDEN SUPPLY SHOP** that has high quality accessories, gardening supplies, and equipment to help your plants thrive. And for our DIY enthusiasts, swing by **THE POLYCARBONATE STORE!** This is where you will find top-quality polycarbonate panels, hardware, sealants and capping to build your next project.

So, whether you're just dreaming or ready to build – let's turn your green thumb dreams into reality!

Choosing the Right Greenhouse for Your Growing Needs

When choosing a greenhouse, you'll need to think about how you plan to use it. Not every greenhouse is built to keep your tropical plants thriving through a snowstorm. We typically see three different types of gardeners based on the greenhouse they select.

1 The Winter-Ready Gardener

WHAT THEY DO:
Love using their greenhouse in spring and summer to get the most out of peak growing months.
WINTER PLANS:
Ready to take a vacation from their busy gardening life come wintertime.
GREENHOUSE GOALS:
Keep their plants protected from frost over the winter.
THEIR GREENHOUSE:
A lovely single pane glass greenhouse, that has an insulating twinwall polycarbonate roof, that lets lots of light in during the growing period.

2 The Season-Extender

WHAT THEY DO:
Start seeding in February, and still grow well into October. They also love testing their hand at some winter crops too.
WINTER PLANS:
Wants to continue gardening through the chilly weather.
GREENHOUSE GOALS:
Extend their growing season and manage colder temperatures.
THEIR GREENHOUSE:
A twinwall polycarbonate beauty to help maintain nighttime temperatures around 55°F, complemented by a heater to keep things warm.

3 The Tropical Plant Lover

WHAT THEY DO:
Specializes in orchids, tropical house plants, and other heat-loving plants.
WINTER PLANS:
Stay cozy in their greenhouse, just like their tropical plants.
GREENHOUSE GOALS:
Maintain a consistently warm space for their tropical and exotic plants.
THEIR GREENHOUSE:
A double pane glass greenhouse with excellent insulation and a heater going to keep things at a cozy 60°F during winter.

Charley's Pro Tip: Make Your Greenhouse Easy to Access

Pick a spot that's close to your utilities and has an easy walking path leading up to it. Think about how you'll get the greenhouse into place – make sure there's enough room to unload crates or bring in tools like a wheelbarrow or watering cans.

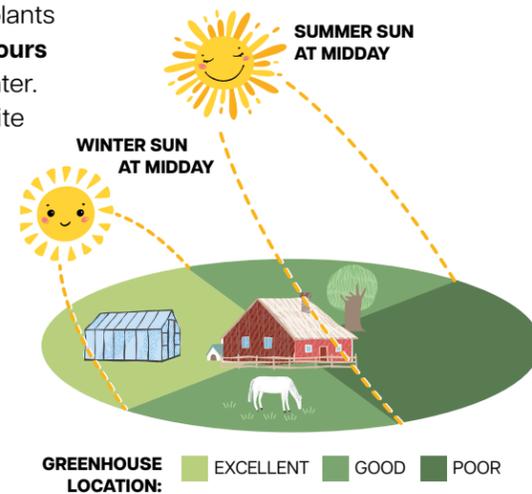

Finding The Perfect Spot

You might have a spot for your greenhouse in mind already, but before you lock it in, check out these tips to help you pick the perfect spot.

Soaking Up the Sun: To keep your plants happy and healthy, aim for at least **6 hours of sunlight each day**, even in winter. If your chosen spot doesn't get quite that much sun, no worries – just add some grow lights to brighten things up. You can find out how many daylight hours you're working with by checking out www.timeanddate.com/sun.

For the best sunshine, position the longest side of your greenhouse to face south. This will let your greenhouse roof soak up the most sunlight throughout the day. If you're looking to extend your growing season with a cool-temperature greenhouse, set it up east to west. This way you'll help keep things cozy, allowing plants to enjoy the maximum sunlight.

Utilities And Your Greenhouse

- 1 **USING ELECTRICITY:** A 220-volt heater, for example, needs more power than a standard outlet. If you're adding fans or other electric systems, you may need to boost your power supply to keep everything running smoothly.
- 2 **CREATE A WORKSPACE:** Add a potting bench for seeding and transplanting.
- 3 **PLUMBING PLANNING:** If planning a concrete foundation, it is best to rough in the plumbing and electrical ahead of time. Consult your plumber and electrician during the planning process.
For wood foundations, utilities are commonly run under the wood after it's constructed.

Many people choose a greenhouse to start growing earlier and for longer, but if you dream of fresh fruits and veggies all year, we've still got you covered!

Year-Round Growing or Seasonal Fun?

Our greenhouses are designed with your needs in mind. Some come with a **solid aluminum frame** tough enough to handle whatever Mother Nature throws at them, while others are made from **Western Red Cedar**, perfect for getting your seeds sprouting early in the spring.

Greenhouse gardening often starts with the joy of summer tomatoes, then moves on to experimenting with winter greens, and before you know it, you're diving into cold-weather crops. That's when the real fun begins! You can play around with **grow lights**, **cozy heat**, or use an **evaporative cooler** to get your greenhouse climate just right. Think of it as an exciting science experiment filled with chances for success and lots of enjoyment.

Always remember – we're here to support you through every season of your greenhouse adventure!

Freestanding Charm? Or Attached Convenience?

With so many greenhouse options available, here is one of the first things to consider: **freestanding** or **attached**. Whether it's stepping into a garden oasis or having an easy walk to harvest, your choice can greatly enhance your gardening experience and functionality.

Freestanding Greenhouses:

- **Garden Showstopper:** Make a bold statement in your garden.
- **Find the Light:** Place it wherever sunlight is best.
- **Flexibility:** Set it up anywhere, with full control over location and look.
- **Choose Your Material:** Available in Wood or Aluminum.

Attached Greenhouses:

- **Step Right In:** Great for quick access to your garden space.
- **Energy Savings:** Acts as a solar collector, benefiting your home's heating.
- **Space Saver:** Uses minimal yard space, blending with your home.
- **Aluminum Only:** Sturdy aluminum, ideal for attaching to buildings.

Sizing: Things to Consider Before Ordering

How big should your greenhouse be, or how much space do you have?

- **Customizable to Your Space:** Many greenhouses are modular and customizable.
- **Need a Custom Fit:** Have a pre-built foundation? We design made to order options to fit.
- **Local Regulations:** Check city codes. Structures under 110 sq. ft. may not need a permit, but it's wise to confirm with your city's planning department.

Each option offers unique perks, from **striking aesthetics** to **easy access** and **energy efficiency**. Consider your routine and goals to make the best choice.

Freestanding Greenhouse

Attached Greenhouse

GETTING GROUNDED: Your Greenhouse Foundation

Now that you have the perfect spot for your greenhouse, let's talk about your greenhouse foundation. **Every greenhouse needs a strong foundation** to make sure it sticks around for the long haul. **Concrete** and **Wood Frame** are the two foundation types we see most often in our greenhouses. Planning your greenhouse foundation might seem like a big task, but don't worry – we're here to help!

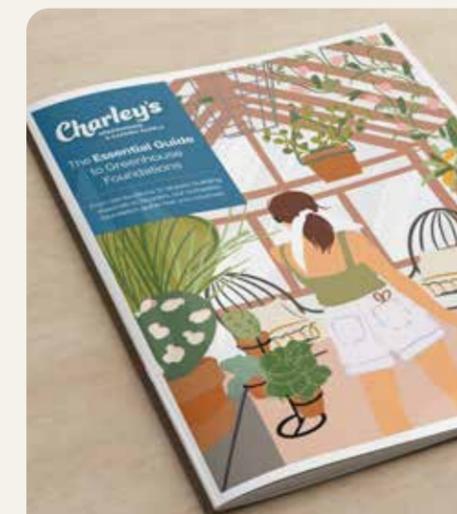

Concrete Foundations

A Concrete Slab Or Perimeter Wall is your most durable option. It'll give your greenhouse a strong, stable foundation that could last for generations. If you're planning on a double glass glazed greenhouse or one bigger than 12x20, concrete is your best bet. Plus, it's easy to clean, which is always a bonus.

Wood Frame Foundations

A Wood Frame Foundation is a simple and budget-friendly option. They're movable too, so, in some areas, your greenhouse might even be considered temporary – no permit required! Wood foundations usually last about 15 to 20 years in typical four-season climates. We recommend them for glass glazed greenhouses up to 12x16 or polycarbonate glazed greenhouses up to 16x20.

Need more tips? Check out our **“Essential Guide to Greenhouse Foundations”** to learn the top things you should know before you get started.

The Sunhaven 8x8

 **\$5,295**
In Stock Ready to Ship
Order Yours Online

The Ultimate 8x8 Backyard Greenhouse

The **8x8 Sunhaven Greenhouse** surpasses typical store-bought kits with its durable, plant-friendly design. Its twinwall polycarbonate panels and 82% light diffusion create the perfect environment for your plants, no matter the season. It can also handle tough weather with ease. Built to last, the Sunhaven holds up to **32 pounds of**

snow per square foot and **withstands winds up to 85 mph**.

Make it your own by choosing a **white, green, or brown frame**. Its unbreakable **6mm polycarbonate glazing** and **interior bolt track system** are designed to handle heavy hanging baskets, shelving or lighting.

Carol's Pro Tip: This is the little greenhouse that could.

The extra sidewall height means more growing space you wouldn't normally get with a big box store model.

Dimensions:
8' 7½" W x 8' 7½" L x 7' 8½" H
Sidewall Height: 5' 6"

Frame: Maintenance-free, rust-proof aluminum for extra strength.

Glazing: 6mm twinwall polycarbonate, 82% light transmission, reduces condensation.

Ventilation: Solar-powered, automatic double-bar roof vent.

Door: Pre-hung storm door with sliding glass panel and screen for extra ventilation. Lockable latch & customizable hinge placement.

Assembly Required: Pre-cut, pre-drilled frame kit ready for you to assemble. Assembly is approx 2 days with 2-3 people assisting.

Warranty: Lifetime warranty for frame and 10-year limited warranty for polycarbonate glazing.

Yours for Only: \$5,295

The Legacy 8x8

Premium 8x8 Glasshouse at an Economy Price

This greenhouse offers both beauty and function, making it the perfect space for your gardening hobby. With **glass sidewalls** and a **polycarbonate roof**, you get the best of both worlds. The polycarbonate offers natural shading while keeping the space warm on cooler days, while the beautiful glass sidewalls invite stunning views of your garden.

The Legacy is ideal for growing all kinds of plants, this greenhouse is also easy to decorate to fit your style.

 **\$5,995**
In Stock Ready to Ship
Order Yours Online

Dimensions:
8' 7½" W x 8' 7½" L x 7' 8½" H

Sidewall Height: 5' 6"

Frame: Maintenance-free, rust-proof aluminum for extra strength.

Frame Color: Rideau Brown.

Glazing: 3mm single overlap glass for sidewalls and 6mm twinwall polycarbonate in the roof with 82% light transmission.

Ventilation: Solar-powered, automatic double-wide roof vent.

Door: Pre-hung storm door with sliding glass panel and screen for extra ventilation. Lockable latch & customizable hinge placement.

Assembly Required: Pre-cut, pre-drilled frame kit ready for you to assemble. Assembly is approx 2 days with 2-3 people assisting.

Warranty: Lifetime warranty for frame and 10-year limited warranty for polycarbonate glazing.

Yours for Only: \$5,995

Charley's Pro Tip:

Get extra eyebolts and line the framing bars with twine. Your tomatoes and cucumbers will grow straight up to the roof vents.

The Westgrove 8x12

Exclusive: \$9,495

In Stock Ready to Ship
Order Yours Online

Why The Westgrove is Better than Big Box Greenhouses:

Looking for a top-notch, **no-permit greenhouse** that doesn't sacrifice quality or strength? The Westgrove is stocked, ready to ship making it easy to get your garden going fast.

High Wind and Snow Loads: 85 mph winds and 32 pounds per sq. ft. means peace of mind when a storm is coming.

Weather Resistance: Unlike other economy greenhouses, The Westgrove is equipped with weather stripping to keep more even temperatures in the greenhouse's environment.

Raised Wall: Want to put it up on a raised wall? No problem, just let us know the height of your wall and purchase a simple and affordable door drop kit.

Choose Your Style: Choose from Arctic White or a Classic Black Frame, at no extra cost.

Flexible Roof Options: Choose classic glass or upgrade to twinwall polycarbonate for added insulation.

No Permit Hassle: Many areas won't require a permit for this size greenhouse, so you can avoid any red tape. Check with your local planning office.

Decorative: Adding decorative ridge cresting is like icing on the cake.

Dimensions:
8' 7½" W x 12' 8½" L x 8' 11⅜" H
with a 5' 6" Sidewall

Frame Color: Choice of Arctic White or Classic Black

Glazing: 3mm single pane overlap glass and optional 6mm twinwall polycarbonate for the roof

Ventilation: Two Solar-powered, automatic double-wide roof vents

Door: Pre-hung lockable storm door with sliding screen for extra ventilation.

Assembly Required: Pre-cut, pre-drilled frame kit ready for you to assemble. Assembly is approx 2 days with 3 people assisting.

Exclusive Offer: \$9,495

The Parkside 8x10 and 8x12

Beautiful as it is practical, the Parkside 8x10 Greenhouse is perfect for gardeners who want both charm and functionality in their backyard. With its classic steep roof, decorative ridge cresting and base panels, it adds an elegant touch to any garden.

No Concrete Needed: Decorative base panels give a polished look without the cost of a concrete foundation. All you need is a single row of 4x4s for the threshold.

Conceal, don't reveal: The base panels also hide unsightly soil bags and pots while providing some added protection to the lower part of your greenhouse. (This helps with mowing and trimming the grass to avoid rocks hitting the glass!)

Snow Sheds Easily: The high-pitched roof allows snow to easily shed which maximizes sunlight exposure in the winter months.

Dimensions:
8' 7½" W x 12' 8½" L x 10' 2⅝" H
with a 5' Sidewall

Glazing: 3mm single pane overlap glass and optional 6mm twinwall polycarbonate for the roof.

Ventilation: Two Solar-powered, automatic double-wide roof vents.

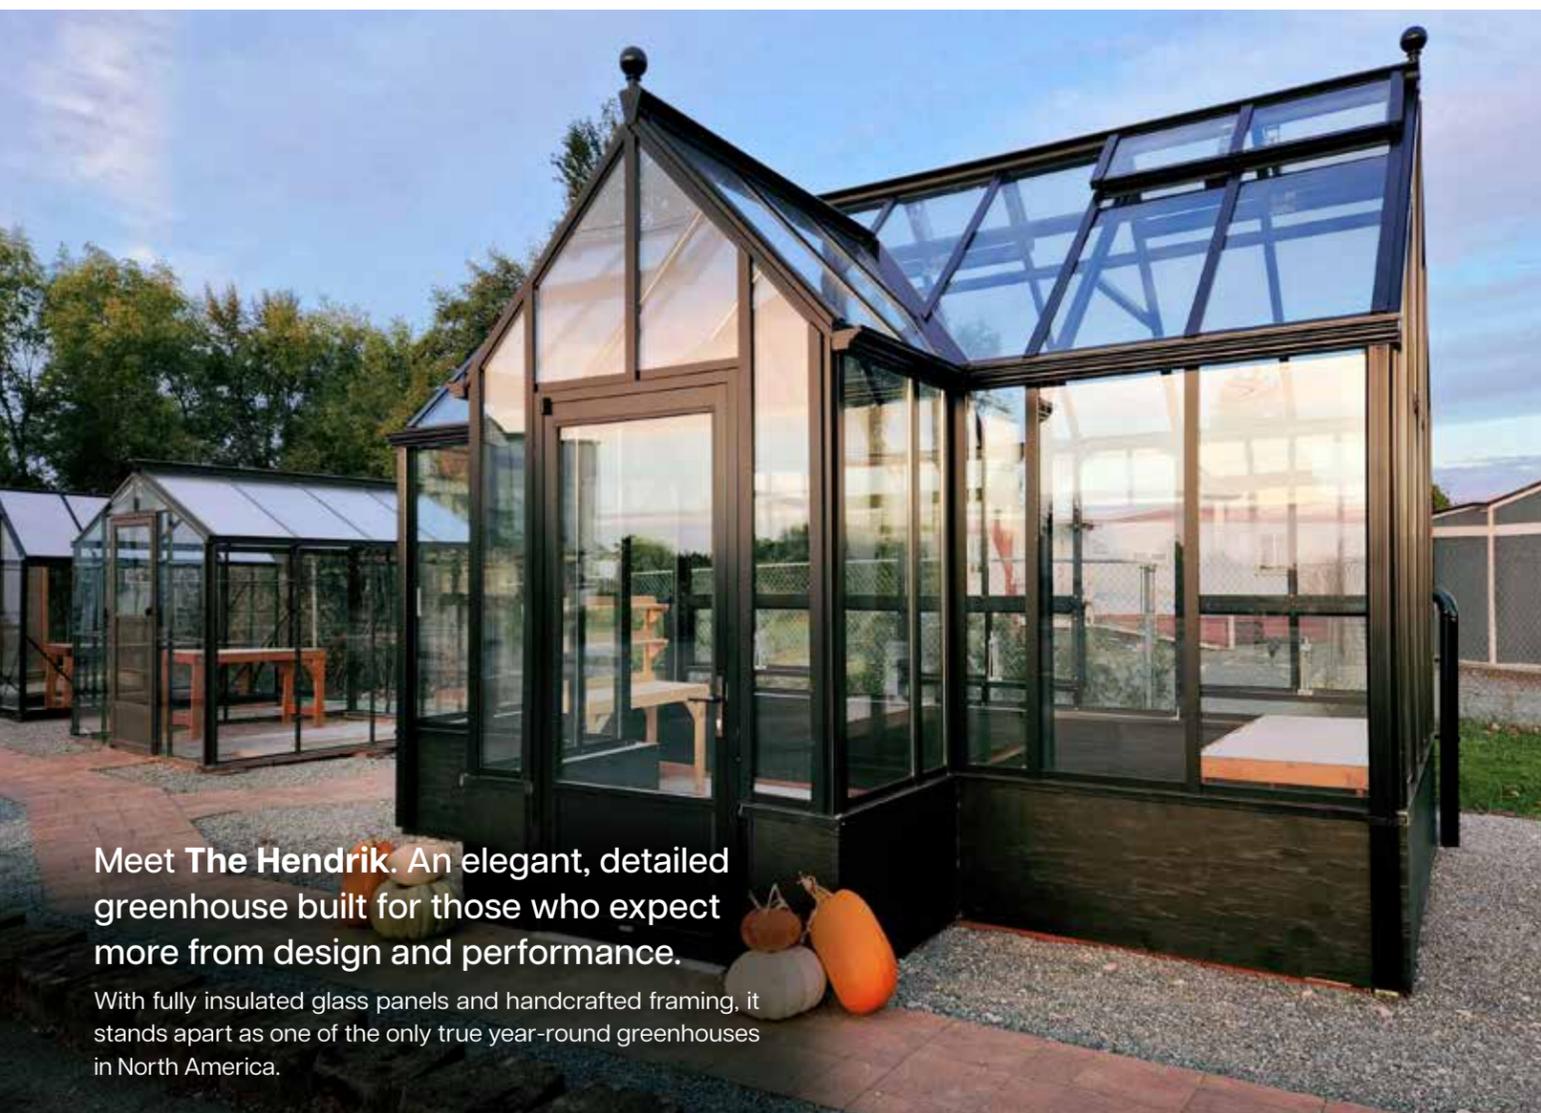

Door: Pre-hung lockable storm door with sliding screen for extra ventilation.

Assembly Required: Pre-cut, pre-drilled frame kit. Time to assemble is a full weekend with three to four people assisting.

Warranty: Lifetime warranty for frame and 10-year limited warranty for polycarbonate glazing.

Two Sizes:
8'x10': **\$12,495**
8'x12': **\$12,995**

16mm Full Sheet, Fully Insulated Double Pane Glass: Extra insulating for four season performance in North American climates.	\$69,995 Save Over \$33,000

*Greenhouse not exactly as shown. Price subject to change.

The Backbone of Your Greenhouse: Choosing the Right Frame

At Charley's, we know how much a quality frame matters – that's why we offer a range of options that are built to last. With our made to order greenhouses, the sky is the limit for our Cross Country Greenhouses. You can **customize nearly any aspect** of the greenhouse including **size, slope, door placement** and **more**. For our made to order Heritage Wood Greenhouses, you have options of glazing, doors, pony wall and stain color. Read more about the differences between wood and aluminum below.

Material Matters: Wood vs. Aluminum Greenhouses. Let's dig into what makes each material stand out, so you can find your perfect match!

Wood Greenhouses	Aluminum Greenhouses
Naturally Insulating: Wood helps keep the inside temperature just right, which is great for your plants year-round.	Built To Last: Aluminum is tough, rust-resistant, and ready for the long haul.
Homey Feel: They have a nice natural warm look, and they smell great too!	Modern Look: With their clean lines and modern vibe, aluminum frames not only do the job but also look great in your garden.
Maintenance Needs: Wood frames do need a bit of love with sealing or staining to keep them looking their best.	Style It Your Way: From elegant ridge cresting to multiple doors, aluminum lets you get creative with the design.
A Bit Heavy: They're a bit heavier, so keep that in mind if you're putting the greenhouse together on your own.	Effortless Upkeep: Set it up, and then just enjoy gardening with little ongoing care.
Eco-Friendly: Wood is a renewable resource, which makes it the more earth-friendly choice.	Lightweight: These frames won't break your back during installation.
DIY Friendly: Want to add a personal touch like hanging plants or shelves? It's easy to drill holes and customize wood frames.	Heirloom Status: These frames are so strong, you might even hand them down to your kids or grandkids.
Ongoing Care: Keep in mind, wood needs more upkeep over the years.	Efficient Temperature Management: Aluminum can quickly adapt to temperature changes, with the right glazing, making sure your plants stay comfortable throughout the seasons.

A Wood Framed WOODLAND CEDAR 8x10 Greenhouse

An Aluminum Framed TRADITIONAL SERIES 14x20 Cross Country Greenhouse

Charley's Heritage Wood Greenhouses

Beautiful, Built to Last, and Just Right for You!

Looking for a cedar greenhouse that's both beautiful and sturdy? Charley's **Heritage Wood Greenhouses** offer the perfect mix of style and strength with top-of-the-line Western Red Cedar's natural durability. **Handcrafted in our Mount Vernon, WA Woodshop**, these greenhouses are crafted to fit beautifully into any garden while holding up through any weather.

Why Western Red Cedar?

Western Red Cedar is naturally resistant to rot, bugs, and rough weather, so it's made to last outdoors. Plus, its warm tones add timeless charm to your space!

- **Resilient:** Cedar stands strong against rot and pests.
- **Eco-Friendly:** Responsibly sourced from sustainably managed forests.
- **Low Maintenance:** Ages beautifully to silver-gray or can be stained a color of your choice.
- **Great Insulation:** Cedar naturally helps stabilize temperature, ideal for year-round growing.

Why Charley's Greenhouses Outshine the Rest

- **Made in the USA:** Handcrafted with care using sustainable materials in our WA Woodshop.
- **Handcrafted Quality:** Choose your size, door type, and extra options for a greenhouse tailored to you.
- **Sturdy Cedar Frames:** Weather-resistant, with weather stripping on all doors and windows for added protection. Frames are priced unstained. Ask our team about stain color options!
- **Affordable Quality:** We keep prices competitive without cutting corners on materials or service.
- **Easy to Build:** Designed for DIY assembly with pre-cut parts and clear instructions.

Alpine Insulated Cedar Greenhouse

The Most Insulated Cedar Greenhouse Anywhere

The Alpine Insulated Cedar Greenhouse is the only cedar greenhouse on the market that utilizes insulated

double pane glass with fivewall polycarbonate in the roof! With insulated glass, rubber gaskets, and a cedar pony wall to keep warmth in, the sturdy crossies and aluminum capping will also protect you against wind and snow.

Here's why it stands out:

- **Sold Unstained:** Choose to receive your greenhouse unstained or select from our range of stain options. Contact our team for details!
- **Best Insulation:** Our 5/8" Double Pane Safety Glass offers excellent insulation (R 2.03). 16mm Super 5X-Wall polycarbonate panels on the roof (R 2.78) and either Triple Wall polycarbonate (R 2.5) or insulated glass on the walls.
- **Cedar Pony Wall:** Provides extra insulation and maintains a stable temperature.
- **Spacious Design:** 6-foot sidewalls offer ample headroom.
- **Automatic Ventilation:** Exhaust fan with a thermostat and motorized shutters controls airflow.
- **Dutch Door:** Keep temperatures steady by opening just the top.
- **Made in the USA:** Handcrafted with care using sustainable materials.

The story of **Charley's Greenhouse & Garden Supply** and **BC Greenhouse Builders**, makers of **Cross Country Greenhouses**, is rooted in shared craftsmanship and dedication to gardeners. A chance trade show meeting led to Charley's becoming their first U.S. distributor nearly 35 years ago.

BC Greenhouse Builders **specializes in custom greenhouses tailored to your needs**. Popular requests include **decorative elements** like ridge cresting, gutters, and transoms, alongside **functional upgrades** such as motorized vents, exhaust systems, and ceiling fan mounts. Clients often adjust dimensions or **upgrade glazing** with options like Low E, tinted glass, or polycarbonate.

Customizations may also involve doors, windows, lowered sidewalls, or attaching to existing structures. Unique features like zoned growing partitions, jogs for sloped foundations, and garage doors are offered, and accommodations for fireplaces as part of your design. We can even design vestibules, porticos, or breezeways to seamlessly connect your greenhouse to your home. Whatever your vision, let's bring it to life!

High Wind and Snow Loads

Built to Withstand the Toughest Weather

Your safety and budget are our priorities. **Cross Country Greenhouses** are designed to handle **wind loads up to 85 mph** and **snow loads of 32 psf**, ensuring reliable performance. For areas with harsher weather, we offer affordable upgrades for increased strength, capable of handling **over 100 psf of snow** and **wind speeds up to 140 mph**.

If permits are needed, we can provide detailed drawings to meet local requirements. Even without a permit, we can add extra supports to enhance load capacity, offering peace of mind without overspending. You don't have to break the bank to invest in a greenhouse that stands strong and keeps your garden safe for years to come.

Pro Tip:

Cross Country Greenhouses are known for their strength and ability to customize.

This is the product to choose if you have a design in mind and want a product that lasts. Be sure to connect with us and we can help walk you through the options!

Cross Country Greenhouses: Customizations and Architectural Enhancement Options

BASE PANELS

Decorative base panels add a touch of sophistication. Eliminates the need for a costly rock wall foundation.

DECORATIVE RIDGE CRESTING

COMMERCIAL STOREFRONT DOORS

Insulated with safety glass and deadbolt lock. Custom sizes, color and panic hardware options.

CUSTOM DOORS

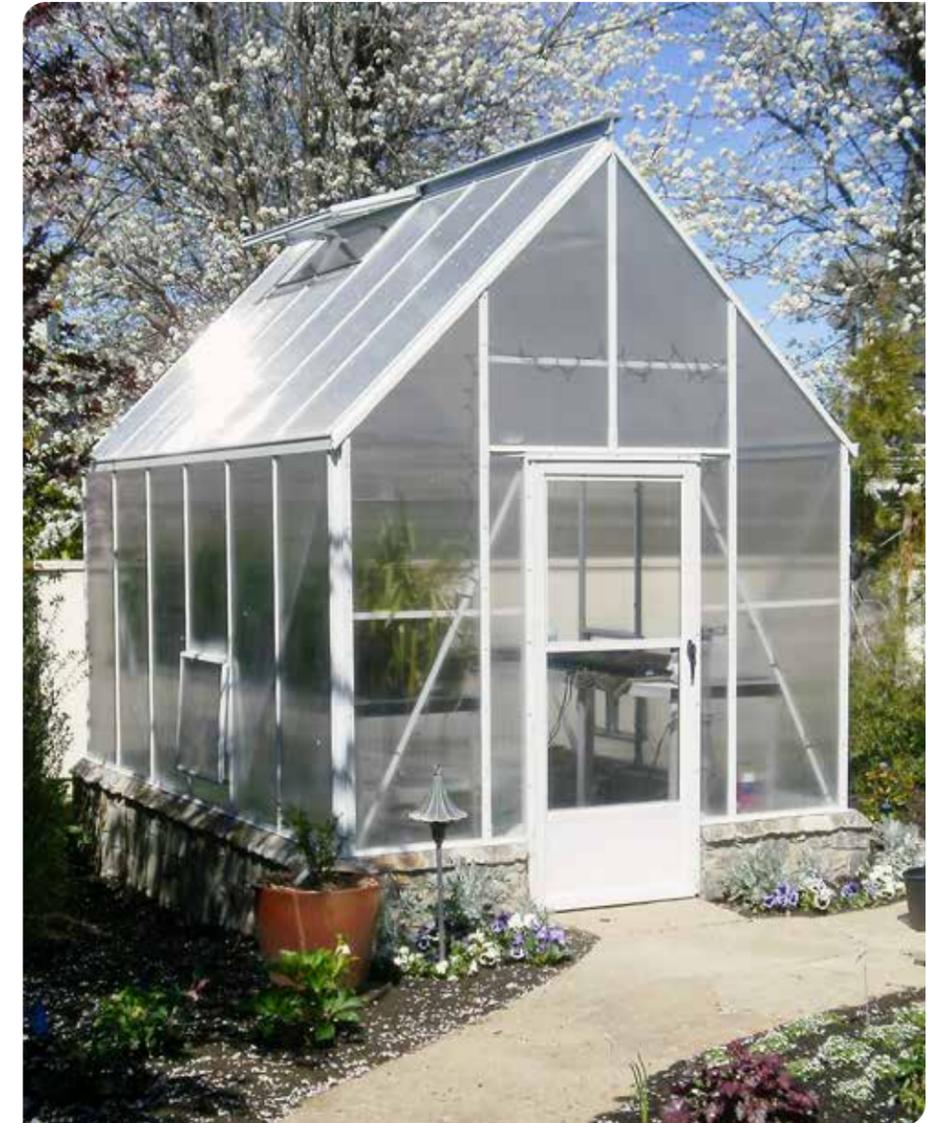

High style custom greenhouse options include sliding, stackable or garage doors for upgraded frame only.

Cape Cod Series Greenhouses

The **Cape Cod** greenhouse has been turning heads all over the place, and it's easy to see why!

With its classic 45-degree, 12/12 roof pitch, this greenhouse not only brings charm to your yard but also offers the perfect space for small trees and hanging baskets. Plus, that steep roof makes snow slide right off, perfect for those chilly, snowy winters.

Charley's Pro Tip:
Moving a door can make a world of difference.

Adding double doors to the sidewall is perfect if you want to bring in larger furniture. Picture this: on a warm evening, you open those doors during dinner. Now, that's an invitation you'll look forward to!

Cape Cod Model 12/12 Pitch					
Dimensions	3mm Glass	6mm Glass	Twinwall	Fivewall	Double Pane Glass
6' 7" x 8' 7½"	\$10,855	\$12,544	\$10,855	\$17,575	\$28,960
8' 7½" x 12' 8½"	\$12,325	\$15,105	\$12,325	\$21,680	\$38,695
10' 8" x 12' 8½"	\$17,140	\$20,576	\$17,150	\$23,440	\$43,130
12' 8½" x 16' 9½"	\$22,235	\$27,605	\$22,235	\$36,775	\$62,340
16' 9½" x 20' 10½"	\$38,300	\$45,903	\$38,300	\$49,610	\$85,445
20' 10½" x 41' 3½"	\$79,825	\$95,894	\$79,825	\$106,110	\$165,650

Didn't find what you're looking for? We can build any size – call us!

Traditional Series Greenhouses

The **Traditional Series** greenhouse, a favorite since the 1950s, is all about energy efficiency.

With a gentle 5/12 slope at 23 degrees, it's perfect for keeping heating costs down by reducing the air volume inside. You can even mix and match glazing options – polycarbonate roofing adds both energy savings and handy shading. It's a great choice if you're working with limited height in your outdoor space, too!

Traditional Model 5/12 Pitch					
Dimensions	3mm Glass	6mm Glass	Twinwall	Fivewall	Double Pane Glass
6' 7" x 8' 7½"	\$9,250	\$10,770	\$9,250	\$15,000	\$24,435
8' 7½" x 12' 8½"	\$9,935	\$12,393	\$9,935	\$15,690	\$32,405
10' 8" x 12' 8½"	\$14,280	\$17,200	\$14,280	\$19,230	\$35,885
12' 8½" x 16' 9½"	\$18,135	\$22,709	\$18,135	\$30,390	\$51,595
16' 9½" x 20' 10½"	\$27,250	\$33,496	\$27,250	\$40,790	\$68,195
20' 10½" x 41' 3½"	\$71,450	\$84,669	\$71,450	\$79,880	\$135,260

Didn't find what you're looking for? We can build any size – call us!

Pro Tip:
Do you have a sloped yard and need help planning your build?

We can help! By creating jogs in the base of the greenhouse, we can combat even the rockiest of slopes.

Cottage Series Greenhouses

If you're looking to blend a greenhouse right into your backyard, the **Cottage Series** is a perfect fit.

The roof pitch matches classic home styles with an 8.5/12 slope set at a 35-degree angle, giving you both snow-shedding ease and extra headroom. It's ideal for adding shelves, hanging baskets, lights, and other handy accessories to make the space your own!

Cottage Model 8.5/12 Pitch					
Dimensions	3mm Glass	6mm Glass	Twinwall	Fivewall	Double Pane Glass
6' 7" x 8' 7 1/2"	\$9,910	\$11,506	\$9,910	\$16,010	\$26,920
8' 7 1/2" x 12' 8 1/2"	\$11,185	\$13,787	\$11,185	\$19,205	\$35,800
10' 8" x 12' 8 1/2"	\$15,505	\$18,659	\$15,505	\$20,745	\$39,770
12' 8 1/2" x 16' 9 1/2"	\$19,725	\$24,658	\$19,725	\$32,045	\$57,810
16' 9 1/2" x 20' 10 1/2"	\$32,000	\$38,857	\$32,000	\$44,625	\$78,665
20' 10 1/2" x 41' 3 1/2"	\$77,330	\$91,813	\$77,330	\$96,390	\$153,780

Didn't find what you're looking for? We can build any size – call us!

Carol's Pro Tip:
Thinking about attaching the greenhouse?

Remove the gable end and attach to an outside door and you have easy access to more living and growing space.

Pacific Series Greenhouses

Our **Pacific Series** greenhouse has a lovely curved roof with a 5/12 slope at 23 degrees – a classic look that stands out!

You can choose from single pane tempered glass, twinwall polycarbonate, or insulated double pane glass. Twinwall is a smart pick for built-in shading and energy efficiency, and it's the easiest to install, too. Plus, our glass greenhouses are made with real bent glass, giving you that durable, genuine look that plastic just can't match!

Pacific Model 5/12 Pitch			
Dimensions	3mm Glass	Twinwall	Double Pane Glass
6' 2 3/4" x 8' 4"	\$11,950	\$8,580	Meridian Estate Greenhouse Frame. Call for Pricing.
8' 3 1/4" x 12' 5"	\$16,775	\$8,565	
10' 3 3/4" x 12' 5"	\$17,400	\$12,895	
12' 4 1/4" x 16' 6"	\$25,305	\$16,010	
16' 5 1/4" x 20' 7"	\$36,440	\$25,795	
20' 6 1/4" x 41'	\$85,245	\$68,945	

Didn't find what you're looking for? We can build any size – call us!

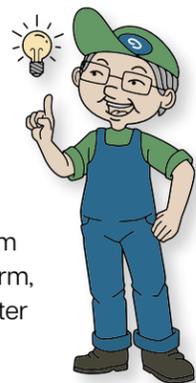

Pro Tip:
Will the twinwall polycarbonate yellow over time?

Nope! It's built with a UV inhibitor to keep it from yellowing. Even with lots of sun, it won't lose more than 6% of its light transmission over 10 years.

Pacific Lean-To Greenhouses

Add a Cozy Attached Greenhouse to Your Home

Imagine stepping from your house into a warm, lush garden - no matter the weather outside.

An attached greenhouse offers gardeners an ideal way to extend their growing season, protect plants from the elements, and keep green space within easy reach.

Pacific Lean-to Attached 5/12

Straight Eave Attached Greenhouses

Let's look at how it can transform your gardening experience!

Make the Most of Your Space: It makes smart use of the space you already have, maximizing every inch to bring you closer to year-round gardening.

Energy Saver: By sharing a wall with your home, it helps keep temperatures steady, which can lead to lower energy bills.

Friendly on the Budget: Compared to an extension on your home, this option costs 40% less than new construction.

Built for Weather: Designed to stand strong against wind and snow, it's a year-round haven for your plants, extending your growing season through every season. The structure will also preserve the attaching wall by protecting it from the elements.

An attached greenhouse, whether it's a lean-to or gable attached, isn't just an addition to your home; it's an extension of your garden life and will become the most loved room in your home. Ready to make every season a growing season?

Custom Greenhouse Designs for Schools and Communities

Thinking about adding a greenhouse to your school or community? We're here to help make it fit right into your space! At Charley's, we can customize the size – any length, width, or height – to match the look and feel of nearby buildings.

Need a greenhouse that's extra strong? Our line of **Cross Country Commercial Greenhouses** is built to handle tough weather, withstanding a minimum of **85 mph** winds and 32 pounds per square foot of snow. We can go even further, designing for any wind, snow, or **earthquake needs**. We'll take care

of the engineering, so your project moves forward smoothly. We also make sure your greenhouse suits your unique space and style. Whether you're looking for a low roof profile or a design that blends in with nearby structures, we've got flexible options to bring your vision to life.

Whether you're working with private developers, contractors for public organizations, setting up a community garden for your local municipality, or planning for a high-end residential space, our experienced team has the talent to complete your project on time and on budget. Let's make your greenhouse work beautifully for your school or community!

NEW ~ LIMITED TIME PRICING

Victory Upright Cold Frame

Part cold frame, part potting bench. All kinds of smart.

Not ready for a full greenhouse yet? Meet our new Victory Upright Cold Frame Bench. Handcrafted by the Charley's Woodshop of durable Western Red Cedar, this clever design is part potting bench, part cold frame. Twinwall polycarbonate panels help trap warmth for seedlings and overwintering, while magnetized front doors open wide to let in fresh air on sunny days. Best of all, the entire unit is raised to working height, no more crouching in the dirt.

It's the perfect fit for patios, porches, and small yards.

Now just \$999

with free shipping for a limited time.*

Product Details:

Size: 86 ¼" Tall, 60" Wide, 26 ½" Deep

*Introductory offer only available for a limited time.

Handcrafted Cedar Benches

Built by hand in our Mount Vernon woodshop, each bench is made to order from hand-selected Western Red Cedar – naturally resistant to weather and pests. With 1" thick slats, they provide a sturdy workspace along with beautiful storage and display for your plants. Pre-cut and pre-drilled for easy assembly. Stain it or let it weather naturally to a silvery gray.

Cedar Grip-Top Bench

This resin grid-top cedar bench is made from durable, industrial-grade resin that resists rust, rot, and corrosion for long-lasting use. The 1" x 1" grid promotes air circulation, drains soil and water, and reflects light to benefit plants.

- Width: 2'
- Length Options: 4', 5', or 6'

SKU: D1004 | Price from \$252

Solid Cedar Top Bench

This attractive, sturdy cedar bench makes a convenient surface for planting seed trays and potting-up transplants! Simple assembly, screws included. Work surface is 30" high.

- Width Options: 20¼", 25½", or 33½"
- Length Options: 4', 5', or 6'

SKU: D1089 | Price from \$245

Want to Maximize Bench Space?

Add an optional Cedar Bottom Shelf to any Charley's Cedar Bench to keep plants and supplies off the ground and effectively double your workspace.

SKU: D1025 | Price from \$84

Charley's Exclusive Cedar Potting Bench Kit

A practical workspace for every gardener, this cedar bench makes planting seed trays and potting transplants simple and comfortable. Handy 5½" shelves keep tools and supplies within reach, and the 30" high work surface offers plenty of room to work. Attractive enough for patios and sturdy enough for greenhouses, it's a long-lasting addition to any gardening setup.

- Width: 25-1/2"
- Length Options: 4' or 6'

SKU: D3023 | Price from \$469
